## BULLETIN

October, 2015

### Conservation Identifies Concern with the Setting Lake Dump

A letter has been received from Environment Officer Jeff Fountain regarding an inspection of the Setting Lake Waste Disposal Grounds and Waste Water Treatment Facilities. The executive advised cottagers in the July 2013 Bulletin that plastic and domestic waste appeared to be mixed in the burn pile and we were directed by Conservation to ensure all of these types of materials (domestic waste and burnables) are separated into two distinct piles. Cottagers were encouraged to respect our dump rules, dump where indicated, do not bring refuse from town and take recyclables including e-waste into town whenever possible. The current letter identifies a number of compliance issues that need to be addressed. We are to create a separate burn pile from the solid waste landfill site, compact and cover the active cell at least twice a year and have an attendant on site at times the dump is open. In a meeting with Mr. Fountain, it was noted that material such as treated wood, plywoods and shingles are not to be burned. The possibility of moving to a waste transfer station was also discussed. The executive is gathering information and costs to completely fence the dump, build a proper burn cell, conduct regular compaction of the active cell and provide a full time attendant during dump hours. A quote will also be obtained to change to a waste transfer station similar to the one at Paint Lake. A plan of action with a likely increase in fees will be presented at May's AGM.
